

## Stockholm Syndrome Bio

Stockholm Syndrome is made up of an all-star cast. When Widespread Panic bass player Dave Schools and acclaimed singer/songwriter Jerry Joseph of the Jackmormons decided to collaborate, each initially thought the side project would be a cool, if temporary, change of pace. With two studio albums released and multiple tours behind them, Stockholm Syndrome has transcended being just a side project. Stockholm Syndrome is a band.

The band's unusual choice for a name, Stockholm Syndrome, refers to the psychological phenomenon in which a hostage bonds with his kidnapers. It seemed an apt moniker for the pair's somewhat convoluted relationship. Now all Schools and Joseph needed was a band.

They put together their "Dream Team" including Eric McFadden (a San Francisco-based guitarist who has worked with Keb Mo', Les Claypool and George Clinton's P-Funk All Stars), Danny Louis (an Upstate NY based keyboard virtuoso widely known for his role in Gov't Mule and Cheap Trick) and drummer Wally Ingram (an L.A.-based drummer who has worked with Jackson Browne, Sheryl Crow, Tracy Chapman and David Lindley). All three musicians were on board and are now back for more live dates, an in-store recording for release and a pending studio album.

Stockholm Syndrome is ready to serve up its potent brew of provocative songs and thrilling, genre-transcending musicianship to worldwide audiences. Schools is already contemplating the future, "We'll take it as far as it wants to go. I think that everyone is really enjoying playing together...it ceased to be a recording project and became a band."

There aren't many bands with the ability to hit the ground running the way Stockholm Syndrome did. And now that they're launched, they show no sign of slowing down soon.
